

ABOUT HARVEST AGRITECH

Harvest Agritech Limited is a Tanzanian company licensed by the Tanzania Sisal Board to carry out business domestically and internationally.

We specialize in the processing, pressing, trading, and export of high quality sisal fibres, sourced from sustainable farms across Tanzania.

Our commitment is to deliver premium natural fibres that meet **international standards** while creating value for our partners and empowering local communities.

A message from our founder.

Welcome to Harvest Agritech Limited. What began as a vision rooted in Tanzania's rich agricultural heritage has grown into a trusted name in the global sisal trade.

Every fibre we process tells a story — of the farmers who tend our land, of the team that refines each bale, and of partners around the world who trust us with their orders.

Our mission is to harness Tanzania's natural wealth responsibly and deliver products that meet the highest international standards.

We invest in modern processing, in our people, and in the communities that make our work possible. Sustainability is not a slogan for us — it is a daily practice.

To our partners across Africa, the Middle East, Europe, and Asia: thank you for your trust. To those discovering us for the first time: we invite you to explore what makes Harvest Agritech a reliable, forward-looking partner.

GASPER PAULO

Founder & CEO
Harvest Agritech Limited

ABOUT THE COMPANY

Harvest Agritech Limited is lincenced by Tanzania Sisal Board to carry out business of domestically and internationally. We want to become the best Exporter of agriculture and forest products.

VISION

To become the leading and most trusted exporter of agricultural and forest products from Tanzania, recognized globally for our quality, reliability, and commitment to sustainability..

VALUE

Quality & Excellence: We are uncompromising in our commitment to delivering products that meet the highest international standards of quality and safety.

OUR PRODUCTS

Sisal Fibress

Product Description (Sisal Fibress)

Our flagship product, sisal fibre, is a premium natural fibre derived from "Harvest Agritech Limited". Renowned for its exceptional strength, durability, and versatility, sisal fibre has been traditionally used in the production of ropes, twines, and cordage. Beyond its classical applications, sisal is increasingly sought after across diverse industries due to its eco-friendly properties and multifunctional use.

Our sisal fibre is ideal for:

- **Textiles and fashion:** including carpets, mats, hats, bags, footwear, and cloth.
- **Industrial applications:** as reinforcement material in composite fiberglass, rubber, and cement products.
- **Specialty products:** such as dartboards, geo-textiles, and other building materials.
- **Paper and packaging:** providing a natural, biodegradable alternative for sustainable products.

At our processing facility, we ensure that every batch of sisal fibre meets rigorous quality standards. From harvesting raw sisal to refining it into high-grade fibre, our vertically integrated operations guarantee a consistent, high-quality product ready for both local and international markets.

We pride ourselves on offering a sustainable, eco-friendly product that not only supports traditional uses but also meets the growing demand for natural, durable, and versatile materials in modern manufacturing
